

Business Survey 2025

Use Your Voice aims to raise awareness of the impact of climate change on Lowestoft: its economic structure, its inhabitants and its landscape.

Our aim is to work as a group and with the community to help to address this issue by using our voice - a voice to be heard because Lowestoft is worth the investment of interest and action.

Flooding has always been a concern: the town is on the frontline and the risk of future flooding is a constant threat. Many businesses and residential properties are based around the port of Lowestoft and the surrounding low lying land.

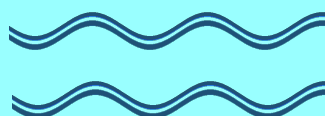

Use Your Voice has created this survey to gain more knowledge from people like you who work and/or live in this area. The survey concentrates on the concerns regarding the threat from the sea to your business and property.

We would be grateful if you could help us in our efforts to make a difference by completing this short survey and we thank you for your time in doing so. The information that we collate will greatly assist us in applying more and sustained pressure on those who have the power to take the appropriate actions needed.

All survey responses will be treated in the strictest confidence and will be anonymised for inclusion in any reports or findings.

Further information about this survey is available from secretary@useyourvoicelowestoft.org.
